

Ridgepoint Performance Medicine

INTERIOR DESIGN VISION - 2026

ROOM 01 of 06 SPACE Front Desk & Entry PRIORITY Brand Anchor

DESIGN INTENT

The First Impression Sets Everything

This room is the handshake. Before a patient meets the doctor, before they sit down, before they say a word — this space tells them who Ridgepoint is. The goal is a reception area that feels elevated, grounded, and calm. Not clinical. Not corporate. *Like performance meets nature.*

ASSESSMENT

What We Keep. What We Transform.

The existing wall color reads well in person — warm gray-white that aligns with our palette with minor adjustments.

✓ KEEP

- Wall color — warm up slightly with a Warm White wash or leave as is
- Interior window — reframe only, the opening itself is a strong feature
- Drop ceiling grid — paint grid black or charcoal, swap tiles for clean white tegular
- Room proportions — generous square footage works in our favor

✗ REPLACE

- Carpet — out entirely, replace with large-format warm stone porcelain tile
- Burgundy baseboards — paint Charcoal #222222 or replace with simple MDF profile
- Honey oak window frame — reframe in matte black or dark charcoal steel-look
- Fluorescent ceiling panels — replace with warm LED recessed wafers over desk
- Any honey oak doors — paint Deep Evergreen or Charcoal

COLOR STORY

The Palette for Room 01

Deep Evergreen does the heavy lifting — appearing on the feature wall, door, and brand mark. Everything else stays quiet so it can speak.

MATERIAL PALETTE

Surface by Surface

FLOOR LUXURY VINYL PLANK (LVP) — BUDGET PICK Skip porcelain tile. LVP in a warm stone or greige wood tone looks nearly identical at \$2–4/sq ft vs \$8–12 for tile. Look for: COREtec Plus, LifeProof (Home Depot), or Shaw Floorté. Waterproof, durable, and easy to install. Estimated room cost: \$800–\$1,500.	FEATURE WALL DARK OLIVE — PAINTED OR LIMEWASH TEXTURED The back wall behind reception in a muted dark olive #3B4A2F — earthy, aged, and organic. Far softer than a true evergreen. Option A: limewash finish for natural depth and texture. Option B: flat plaster paint with the logo in brushed brass. Feels found in nature, not painted on.
DESK SURFACE WALNUT + WHITE OAK MIX Reception desk face in rich dark walnut with light white oak accents — mixed wood tones add depth and warmth that feels organic, not matchy. Stone or solid surface top in warm white quartz or honed limestone. Clean horizontal lines. Brass pulls tie it all together.	WINDOW FRAME PAINT IT — DON'T REPLACE IT Don't replace the honey oak frame — paint it. Rust-Oleum or Sherwin-Williams Emerald in Charcoal or matte black. Light sanding + primer + two coats transforms it completely for under \$40. Same approach for all honey oak door frames throughout the suite.
SOFT GOODS BUDGET SEATING — ARTICLE, WAYFAIR, OR MARKETPLACE 1–2 low-profile chairs in warm oatmeal or sage. Article Sven or Ceni chairs (\$400–\$600 each) look high-end. Wayfair's Mercury Row line has clean shapes. Facebook Marketplace / Craigslist for quality vintage pieces at \$50–\$150. Add a throw pillow in Sage or Stone to brand the look.	GREENERY LIVE PLANT — OLIVE TREE OR FICUS One statement plant in a matte stone or terracotta planter. Placed in a corner or beside the desk. Live only — artificial plants undercut the premium feel immediately.

EXECUTION CHECKLIST

Room 01 — Every Decision

01 FLOOR Remove carpet + pad. Install large-format porcelain in warm stone tone. Matte finish, tight grout lines.	02 BASEBOARDS Paint existing or replace. Color: Charcoal #222222. Simple, flat profile — no ornate molding.
03 WALLS Side walls warm white. Feature wall behind desk in dark olive #3B4A2F — limewash or flat plaster finish for organic depth.	04 INTERIOR WINDOW Reframe in matte black. If budget allows, add frosted lower panel for staff privacy while keeping light transmission.
05 CEILING Paint grid matte black or charcoal. Replace tiles with clean white 2x2 tegular tiles. Remove fluorescent panels above desk zone.	06 LIGHTING Install warm LED recessed wafers (2700–3000K) above desk. Consider a simple linear pendant if ceiling allows. No overhead fluorescents.
07 RECEPTION DESK Mixed walnut and white oak — dark walnut body with oak accents or vice versa. Stone or quartz top. Clean horizontal lines, brass pulls.	08 LOGO / SIGNAGE RIDGEPOINT PERFORMANCE MEDICINE in brushed brass dimensional letters on Evergreen feature wall. Clean sans-serif, generous spacing.
09 SEATING 1–2 low-profile chairs. Natural linen or sage boucle. Side table in white oak. No waiting room sets.	10 PLANT One statement olive tree or ficus. Matte stone planter. Positioned near entry or beside desk. Live only.
11 DOORS Paint honey oak door(s) in Dark Olive #3B4A2F or Charcoal. Update hardware to brushed brass or matte black.	12 ART / IMAGERY One curated movement photograph or abstract print. Framed simply in black or brass. No stock medical imagery.

LIGHTING STRATEGY

Warm. Layered. Never Fluorescent.

Lighting is the single highest-impact, lowest-cost transformation in this room. The existing fluorescent grid panels cast flat, institutional light that works against everything we're building. The fix is straightforward.

LAYER 01 Ambient Warm LED recessed wafers throughout. 2700K color temperature. Dimmer-controlled.	LAYER 02 Task Under-counter LED strip at desk for staff workspace. Concealed, warm tone.	LAYER 03 Accent Directional spotlight on logo wall. One picture light over art piece if applicable.

BUDGET GUIDE

Three Tiers. One Vision.

The same design intent scales across three investment levels. Each tier delivers the Ridgepoint aesthetic — the difference is in materials, custom work, and finish quality. Room 1 should always receive the largest share of the budget as the primary brand moment.

TIER 01 Smart Start — \$25,000 Total Buildout

LVP flooring, painted frames, IKEA-based desk, budget seating. Full brand impact through paint, lighting, and signage. Every dollar is visible.

FLOORING (LVP) \$800–\$1,500 COREtec or LifeProof	PAINT + TRIM \$300–\$600 SW Emerald · DIY friendly	RECEPTION DESK \$600–\$1,200 IKEA BESTÅ styled	LIGHTING \$400–\$800 LED wafers · electrician	SEATING + DECOR \$800–\$1,500 Article / Wayfair / Marketplace
LOGO SIGNAGE \$400–\$900 Etsy dimensional letters				
ROOM 01 ALLOCATION - TIER 1				\$3,300 — \$6,500

TIER 02 Elevated Finish — \$35,000 Total Buildout

Upgrade to porcelain tile in entry zone, semi-custom desk with quartz top, better seating brands, pendant lighting, and a limewash or plaster texture on the feature wall.

FLOORING (MIXED) \$2,000–\$5,500 Porcelain entry + LVP rooms	PAINT + TEXTURE WALL \$800–\$1,500 Limewash or plaster feature wall	RECEPTION DESK \$2,000–\$3,500 Semi-custom · quartz top	LIGHTING \$1,000–\$1,800 Recessed + pendant + accents	SEATING + DECOR \$3,000–\$5,000 Article · CB2 · live olive tree
LOGO + WINDOW FRAME \$900–\$1,500 Pro sign co · reframe window				
ROOM 01 ALLOCATION - TIER 2				\$8,200 — \$14,300

TIER 03 Full Vision — \$55,000 Total Buildout

No compromises. Large-format porcelain throughout, fully custom white oak desk with honed stone top, designer lighting, architectural lighting design, professional millwork, and premium signage. This is the version patients talk about.

FLOORING (PORCELAIN) \$3,500–\$5,500 24x48" large-format · full suite	PAINT + MILLWORK \$1,500–\$2,500 Venetian plaster feature wall	RECEPTION DESK \$5,000–\$9,000 Fully custom white oak + stone	LIGHTING \$2,500–\$4,000 Full architectural lighting design	SEATING + DECOR \$3,000–\$5,000 Designer pieces · curated art
SIGNAGE + MILLWORK \$2,000–\$4,000 Brass letters · custom trim · frames				
ROOM 01 ALLOCATION - TIER 3				\$17,500 — \$30,000
