

REDUCE PAIN · RESTORE FUNCTION · KEEP LIFE IN MOTION

Evidence-based musculoskeletal care focused on **meaningful outcomes**, respecting your goals, and **always doing what is right** for every patient.

FOUNDING PRINCIPLE

"Always do what's right for the patient."

WHO WE ARE

RidgePoint Performance Medicine was founded on a simple belief: people deserve healthcare that is **honest, effective, and centered on their goals**. Our model brings together sports medicine, rehabilitation, manual therapy, and movement expertise under one roof — helping patients reduce pain, restore function, and remain active through every stage of life. We exhaust every **conservative, non-operative option** before recommending procedures, and every recommendation is grounded in **current evidence**.

OUR VALUES

01 Do What's Right Patient interests above convenience, routine, or financial incentives.	02 Earn Trust Through honesty, transparency, consistency, and exceptional care.	03 Pursue Better Continuous learning, innovation, and improvement in everything we do.	04 Make It Meaningful Every recommendation should create real value for our patients.	05 Keep Life in Motion Helping people maintain the strength to keep doing what matters.

SERVICES

01 Sports Medicine Physician-led evaluation and diagnosis for all musculoskeletal conditions. The right diagnosis is established before any treatment begins, ensuring your care plan is grounded in an accurate clinical picture.	02 Manual Therapy & Corrective Exercise Hands-on soft tissue treatment paired with corrective exercise to address the underlying drivers of pain and movement restriction. Every session reinforces lasting change through purposeful movement.
03 Rehabilitation & Performance Structured, progressive programs designed to restore movement, build functional strength, and prevent re-injury. From post-injury recovery to return-to-sport and long-term resilience training.	04 Interventional & Procedural Care When conservative management has been appropriately exhausted, evidence-based procedural options including ultrasound-guided injections are available. All procedures are physician-performed.

THE TEAM

Dr. Eric Anderson, MD SPORTS MEDICINE PHYSICIAN Board-certified, 15+ years in non-surgical orthopedic care. Air Force veteran, fellowship trained, former EWU and US Ski Team physician.	Dr. Robert Friendt, DC DOCTOR OF CHIROPRACTIC Former Division I decathlete. Texas Chiropractic College. 10+ years alongside UT Orthopedics in the Houston Medical Center.
